

Cleaning Instructions

- Keep floor as clean as possible at all times
- Remove surface dirt and dust regularly, using a vacuum cleaner with soft bristle head, or sweep with a soft bristle broom.
- We recommend the use of a moist mop (or static mop).
- We recommend low alkaline cleaners.

Maintenance Guide

- Do not slide furniture or equipment on the floor.
- You should provide floor protectors under all furniture or equipment legs, chair castors, products with rubber feet.
- Make sure the floor protectors are big enough to provide adequate protection to the floor.
- Replace the floor protectors periodically and make sure they are free of dirt or grit.
- Do not use wax or polish on the flooring.
- Avoid pet paws causing damage to surface.
- We do not recommend the use of steam mops.
- We recommend use of low alkaline cleaners.
- Do not use any product that may scratch the surface (steel wool or others).
- Scuff marks and stubborn stains may be removed by lightly rubbing with a cloth.
- Debris stuck to the bottom of shoes can scratch the flooring.
- Rugs or mats on the floor may scratch the surface or leave colour stains.
